PROFILE

Computer Science and Engineering graduate with 9.5/10 CGPA and hands-on experience in software development, application support, data engineering, cloud technologies, testing, troubleshooting and technical problem-solving. Strong foundation in JavaScript, TypeScript, Python, Java, SQL, REST APIs, relational and NoSQL databases, cloud platforms and modern software engineering practices. Experienced in developing end-to-end applications, data pipelines and API-driven systems while investigating technical issues, analyzing logs and application behavior, and collaborating across teams. Strong interest in enterprise applications, digital transformation, retail technology, application support, automation and data-driven solutions.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, Java, SQL

Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Material UI

Backend: Node.js, Express.js, NestJS, Spring Boot, Django, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Redis

APIs & Integration: REST APIs, JSON, API Integration, Authentication, OAuth2, JWT, Microservices, Webhooks

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Linux

Data Engineering: Databricks, Apache Spark, PySpark, SQL, ETL/ELT, Data Pipelines, Data Validation, Data Quality

Testing & Quality: Unit Testing, Integration Testing, Functional Testing, Automation Testing, API Testing, Debugging, Root Cause Analysis

Software Engineering: SDLC, Agile/Scrum, OOP, Data Structures & Algorithms, System Design, Code Reviews, Documentation

AI & Automation: Generative AI, LLMs, RAG, LangChain, OpenSearch, AI Agents, Workflow Automation, n8n

Tools: Git, GitHub, Postman, Jira, VS Code, Cursor, Antigravity, Codex

EXPERIENCE

Software Development Intern | EcoReady Germany — Remote | Jul 2025 – Dec 2025 | 6 months

- Developed and maintained full-stack application features using JavaScript, TypeScript, Python, REST APIs and databases.
- Translated functional requirements into application workflows, reusable components and backend services.
- Built and integrated REST APIs while handling validation, authentication, error handling and application data flows.
- Worked with relational and NoSQL databases to implement data persistence, retrieval and validation.
- Investigated application issues through logs, API responses, database records and frontend behavior, identifying root causes and implementing fixes.
- Performed functional, integration and regression testing across application workflows.
- Collaborated with distributed team members to troubleshoot issues, review implementations and deliver enhancements.
- Used Git, Agile/Scrum and CI/CD practices throughout the software development lifecycle.
- Prepared technical documentation for application workflows, APIs, implementation details and troubleshooting procedures.
- Demonstrated ownership of assigned tasks while adapting to changing requirements and learning new technologies.

PROJECTS

DataBoard — Full-Stack Data Analytics Platform | Python, FastAPI, Angular, PostgreSQL, AWS

- Built a cloud-deployed analytics platform for CSV ingestion, statistical analysis, interactive data visualization, authentication, and dataset management.
- Implemented REST APIs, SQLAlchemy/PostgreSQL persistence, Pandas data processing, pytest testing, and AWS deployment using EC2, RDS, S3, and CloudFront.

GreenTrace — AI-Native Full-Stack Platform | Next.js, NestJS, Supabase PostgreSQL, Stripe, Groq, MCP, Vercel

- Built an AI-powered platform for sustainability tracking and intelligent workflows, with authentication, data management, and AI-assisted user interactions.
- Implemented Next.js/NestJS APIs, PostgreSQL workflows, caching, Groq-powered ReAct agent, custom MCP server using JSON-RPC 2.0.

VIGIL — Industrial Safety Intelligence Platform | Next.js, React, TypeScript, MongoDB Atlas, AWS, LangChain

- Built a real-time industrial safety intelligence platform combining IoT sensor streams, permits, incident intelligence, risk detection, and AI-powered emergency response.
- Implemented SSE, MongoDB workflows, RAG/AI agents, AWS S3/SES integrations, PDF reporting, and multi-agent architecture.

OPEN SOURCE & HACKATHONS

- GirlScript Summer of Code 2026 — Open Source Contributor | 2026
- Hack With Gujarat — 1st Position | 72-hour hackathon | 2025

EDUCATION

Bachelor of Technology – Computer Science and Engineering **9.5 CGPA**
Bharati Vidyapeeth (Deemed to be University), Department of Engineering and Technology, Kharghar, Navi Mumbai | 2021 – 2025

CERTIFICATIONS

- Google Cloud Certified: Associate Cloud Engineer Certification — 2026
- Microsoft Certified: Azure AI Apps and Agents Developer Associate — 2026
- Copado AI Certified: Salesforce DevOps Certification — 2026

LANGUAGES

- English
- Hindi
- Gujarati (Native)
