PROFILE

Computer Science graduate with hands-on full-stack development experience across Python, TypeScript, React, Next.js, backend APIs, PostgreSQL, MongoDB, AWS, Docker, and Linux environments. Experienced in building and deploying cloud-integrated applications, authentication, testing, third-party integrations, AI-enabled workflows, and reusable components. Strong problem-solving foundation with 500+ DSA problems solved and open-source contributions through GirlScript Summer of Code 2026. Interested in software engineering opportunities and mentor-driven engineering teams.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Material UI

Backend: FastAPI, Django, Node.js, Express.js, NestJS, Spring Boot, GraphQL, REST APIs

Cloud & DevOps: AWS, Microsoft Azure, GCP, Docker, Kubernetes, Git, GitHub Actions, CI/CD, Vercel

Databases: MongoDB, Redis, PostgreSQL, MySQL, SQLAlchemy

Engineering: Linux, pytest, API Testing, Debugging, JWT, OAuth, Pinecone, OpenSearch, RAG, LLMs, AI Agents, MCP

EXPERIENCE

Software Development Intern | EcoReady Germany — Remote | Jul 2025 – Jan 2026

- Developed and maintained frontend and backend product features using Next.js, TypeScript, Tailwind CSS, and NestJS.
- Built RAG and document-processing workflows using OpenSearch, LLMs, PaddleOCR, and Tesseract OCR.
- Integrated OAuth-based connectors for Gmail, Slack, HubSpot, Salesforce, and SharePoint.
- Worked across feature development, API integration, debugging, documentation, and iterative product improvements.
- Worked with EU AI and data privacy requirements in an international software development environment.

SELECTED PROJECTS

DataBoard — Full-Stack Data Analytics Platform | Python, FastAPI, Angular, PostgreSQL, AWS

- Built a cloud-deployed analytics application for CSV ingestion, statistical analysis, interactive visualization, authentication, and dataset management.
- Implemented REST APIs, PostgreSQL persistence with SQLAlchemy, Pandas data processing, pytest tests, and AWS deployment using EC2, RDS, S3, and CloudFront.

GreenTrace — AI-Native Full-Stack Platform | Next.js, NestJS, Supabase PostgreSQL, Stripe, Groq, MCP, Vercel

- Built and deployed an AI-powered web application with reusable UI, authentication, PostgreSQL workflows, API integrations, caching, and production monitoring.
- Implemented a ReAct-based AI agent with specialized tools and a custom MCP server using JSON-RPC 2.0.

VIGIL — Industrial Safety Intelligence Platform | Next.js, React, TypeScript, MongoDB Atlas, AWS, LangChain

- Built a real-time safety platform combining IoT sensor streams, permits, incident RAG, and AI agents for compound-risk detection and emergency response.
- Implemented Server-Sent Events, MongoDB workflows, AWS S3/SES integrations, PDF reporting, and multi-agent architecture.

OPEN SOURCE & HACKATHONS

GirlScript Summer of Code 2026 — Open Source Contributor | 2026

- Contributed to public GitHub repositories through pull requests involving feature development, bug fixes, routing, UI improvements, notifications, and application workflows.

Hack With Gujarat — 1st Position | 72-hour hackathon | 2025

- Built CrimeVision AI, a full-stack AI system for CCTV and live face recognition using React, TypeScript, Python, FastAPI, InsightFace, and FAISS.

EDUCATION

Bachelor of Technology — Computer Science & Engineering | Bharati Vidyapeeth (Deemed to be University), Navi Mumbai | 2021–2025

CGPA: 9.5/10 | Elective: Industrial IoT

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate — 2026
- EU CloudCamp4SMEs SMEs Employees Certification — 2025
