Profile

Full-Stack AI Developer | Cloud Enthusiast | 1+ year Internship experience

Dynamic Full-Stack AI Developer with internship experience in software development, AI/ML systems, and cloud technologies. Skilled in React, Next.js, Node.js, LLMs, RAG, and scalable backend development, with hands-on exposure to GCP through Google Cloud Arcade.

Skills

Frameworks: MERN, Next.js, NestJS, Django, FastAPI, Laravel, Tailwind

Programming Languages: JavaScript, TypeScript, Python, Java, PHP

Cloud Platforms & Services: GCP, Azure, AWS, Cloudflare, Kubernetes

Queueing & Caching: Celery Workers, RabbitMQ, Redis

Development Concepts: REST APIs, CRUD Operations, Middleware

(CORS, OAuth), SDLC, Agile methodology

Workflow Automation & Integrations: n8n, Zapier

Databases & Storage / Data Platforms: MongoDB, PostgreSQL,

Firebase, OpenSearch, Snowflake, Pinecone, Weaviate

Version Control & DevOps: Git, GitHub Actions, CI/CD, Docker

AI / LLM Frameworks & Agent Tooling: LangChain, crewAI

ORMs / ODMs: Mongoose, Prisma

Monitoring & Observability: Prometheus, Grafana

Tools & Collaboration Platforms: Zoho, Neeto

Experience

Software Development Intern | EcoReady Germany / Remote | July – Dec (2025)

- Engineered scalable UIs using Next.js, TypeScript, Tailwind CSS, and NestJS with optimized rendering and reusable components.
- Developed RAG pipelines using OpenSearch, LLMs, PaddleOCR, and TesseractOCR for GenAI document workflows.
- Integrated OAuth-based connectors for Gmail, SharePoint, Slack, HubSpot, and Salesforce platforms.
- Worked with EU AI and data privacy compliance standards published through the EUR-Lex portal.
- Completed EU CloudCamp4SMEs Certification co-funded by the European Union with AWS as the official training partner.
- Participated in ClimateX GoGlobal Bengaluru alongside German delegations and GCC leaders from Mercedes-Benz, Volvo, JLR, and Bosch.

AI & ML Intern | Infosys (Springboard 5.0 – MelanoAI) Bengaluru / Remote | Oct – Dec (2024)

- Developed an AI-based skin cancer screening system involving medical image preprocessing, deep learning-based image classification, and model performance optimization for accurate prediction and analysis.

Full Stack Development Intern | Grid R&D Bengaluru / Remote | July – Sept (2024)

- Built responsive UIs using React.js and Tailwind CSS, directly enhancing user experience.
- Developed and optimized RESTful APIs using the lightweight Node.js & Express.js framework.
- Implemented relational database operations via MySQL to efficiently store and manage operations.
- Resolved critical integration issues in a fast-paced team environment to ensure seamless product delivery.

Projects

FoodOrder

- A full-stack team food ordering application featuring RBAC and country-based data isolation, built using Next.js 15, Nest.js, Supabase (PostgreSQL), Stripe, and JWT authentication.

Disaster Response Coordination Platform

- Backend-heavy MERN app for disaster response with real-time data, geospatial mapping, AI-based location extraction, image verification, and social media monitoring.

EcoTravel

- A web-app platform that helps users plan sustainable trips by promoting eco-friendly travel choices while reducing environmental impact, without sacrificing convenience or experience.

Education

BVDU Department of Engineering and Technology, Off Campus B.Tech – Computer Science Engineering | 2021 – 2025

De Nobili School F.R.I., Dhanbad, ICSE (12th and 10th) | 2021, 2019

9.5 CGPA

88.2 %, 86.4 %

Certifications

- EU CloudCamp4SMEs – AWS Cloud Certification
- GitHub Foundations Certification
